Comments

Collections reported by the various departments, officers and agents of the town were compared in detail with all of the information available in regard to the monies that should have been collected. An analysis was made of the tax blotter, for the purpose of determining the amount of taxes turned over to the Collector for collection, and discounts given were investigated as to the dates on which tax payments were received. Wherever practicable the amount of money that should have been received was verified by direct correspondence, as for example, in the case of remittances from the State Treasurer and County Commissioner. The receipts of the municipal court and town clerk were verified in detail.

It is our opinion that all of the money that should have been received by the Town for the period under review had been received and properly accounted for.

All disbursements were supported by adequate and proper vouchers.

HEALTH OFFICER'S REPORT

There have been reported by the Doctors and Nurses the following cases of contagious diseases, since my last report.

1 case of Infantego, 1 of Undulent Fever, 3 of Typhoid Fever with 2 deaths, 5 cases of Measles, 5 of Whooping Cough, 12 of Scarlet Fever, with one death, 21 cases of German Measles, 22 of Chicken Pox, 18 cases of Venereal Diseases and 7 Infantile Paralysis, mostly of a mild nature, but all were Quarantined.

From the last of May until the middle of August there was an epidemic of Septic Sore Throat with nearly nine hundred cases. No report of these cases was made, until the epidemic had gained such headway that it was almost impossible to check it. As soon as it came to my knowledge, I called the State Board of Health, and a quarantine was put on all cases, and a careful inquiry made as to the source of the trouble. There was but one death reported, many were seriously ill, and have suffered after effects. The State Board of Health gave it as their opinion that it was not due to our Water Supply at all, but was traceable to Ice Cream or Milk.

We are still confronted with the disposal of Garbage. Dumps were reported from every direction in many places, and were attended to, as far as possible.

I have posted several bridges, where rubbish was being dumped into the river, and have posted several swimming places, warning people of the danger of bathing in polluted water. A suitable place for bathing should be provided for the public, that would be safe and clean.

The State Board of Health, division of Maternity and Child Hygiene held a Clinic here in September of which I have the following report: "Children attending 66, found with defects 50, total defects found 118, defects found corrected 17. Number held none. Cooperating agencies, were the local American

Legion Auxiliary, Board of Health, Churches and the Selectmen. Lois W. Barton, R. N."

As usual I have answered every call, established Quarantine, wherever it was necessary, and assisted in every way I could in keeping Lebanon one of the cleanest Towns in the State. I have received the cooperation of most of the people that have made complaints, and I wish to thank all who have assisted me in carrying on this very important but disagreeable work.

GEO. U. L. LEAVITT,

Health Officer.

REPORT OF MILK INSPECTOR

We have had no outbreak of disease the past year that has been traced to our milk supply.

The people of Lebanon are using raw milk as we have no Pasturizing Plant.

The danger of Undulant Fever which is very great could be cut down and eliminated by two methods. 1st The Producers sign up for the Bang's test, which means that all cattle reacting to this test are at once removed from the herd, being paid for by the State and Government; 2nd Method, A central pasturizing plant whereby all of the milk sold in Lebanon is pasturized. The 1st method, in my opinion is the better of the two for this danger due to the fact that pasturization destroys a per cent of Vitamin D which is very beneficial to public health.

The general routine of past years has been carried out, such as visiting the producers and going over the proper technique of cooling, method of washing and sterilizing bottles and utensils used in the milk room. Samples were taken from the milk trucks while in the process of delivery and shipped in iced cases to the State Laboratory of Hygiene.

W. B. MOWERS,

Milk Inspector.
